Pallet Chart & Shipping Policy

For your convenience in figuring percentage of truckload required for your order, we have prepared a Pallet Chart to assist you in determining the quantity of material required for a Pool Truck or Truckload. These figures are approximate, and inclusion of complete order is not guaranteed in pool trucks. Please indicate where we may add or delete. Where ninety percent of material is delivered, we will not assume expense of filling back orders.

Consolidated Shipments

Consolidated shipments whether truckloads, or pool loads:
1. Full freight allowed on minimum truckloads.
2. Prepaid pool truckloads are arranged on orders of one third truckload (16 pallets) or more provided total orders from the area are sufficient to fill trailer.

Maximum Truckload will require 52 pallets

Any questions regarding loads will be answered either by the Factory Correspondent or the Manufacturer’s Representative serving your account.
Freight terms are subject to change without notice.
